Dear Dennis,

I gather the people working on this campaign have been talking with you about the resolution they hope the Council will pass instructing Cambridge to stop buying from Hewlett Packard. I am a supporter of that campaign and this note is mainly encourage your support of such a resolution.

Generally, international affairs are not the business of a city council. In this case, however, as Cambridge actually buys HP products, there is an immediate local involvement. Also, the Cambridge City Council has precedents for taking positions on international violations of human rights, usually on the right side of history, as this resolution would be.

My family came to this country as refugees from the Nazis after the German invasion of the Netherlands in WWII. While I support the existence of Israel, the behavior of that country toward the Palestinian people cannot be condoned, and at this point to be a loyal customer of HP is to be complicit.

I would be pleased if Cambridge would join the boycott of HP and hope that you will support that effort.

Thank you for your attention.
Ann
